Self-taught Frontend Developer with more than one year of remote experience. At StartUp Minded, I led frontend technical decisions, improved platform user experience and developed complete products such as Mi vida en espera and the frontend of SM Copilot, implementing modern architectures.

I work with a strong product mindset with a focus on performance, accessibility and scalability.

PROFESSIONAL EXPERIENCE

StartUp Minded

FrontEnd Developer

Remote, Barcelona, Spain

Octubre 2024 – Noviembre 2025

- Improved user experience and clarity of the company's main platform, reducing navigation friction and possible points of confusion through structural and accessibility enhancements.
- Designed and developed a full client platform from scratch, implementing progressive pagination and infinite scroll, authentication flows, account management and social interactions using Auth.js, Nodemailer and SQLite3 (Turso).
- Built the frontend of SM Copilot using a hybrid architecture (Astro Islands), implementing full project management (CRUD), keyboard-accessible search, and optimistic UI updates with automatic rollback handling.
- Made frontend architectural decisions aligned with business objectives, acting as the technical reference for the area.
- Structured documentation by roles and delivery processes, improving internal communication and reducing ambiguity in handoffs.
- Participated in technical interviews and profile definition, contributing to team building decisions.
